INTRODUCTION

*I*t's been an odd year in the world of firearms. Sales of guns nationwide were generally flat, perhaps, as some people note, because there is a Republican president in the White House. It seems demand for firearms goes up when the Democratic party is in control, as people fear that there will be more restrictions on firearms, so they go out and buy more guns before any laws change. In contrast, when a pro-gun president and Congress are in charge, people don't panic and don't buy as many firearms. Go figure.

Editor Jay Cassell checks out the new Browning Citori CXS Crossover Sporting over/under shotgun. With gold engraving on the steel receiver and polished blued barrels with a lightweight profile, the gun is perfect for sporting clays, skeet, or use in the field.

According to recent statistics provided by the National Shooting Sports Foundation (NSSF), the trade association for the firearms industry, the number of background checks in 2017 was down compared to previous years. The National Instant Criminal Background Check system (NICS) is used by Federal Firearms Licensees (FFLs) to instantly determine whether a prospective buyer is eligible to buy firearms. Before ringing up the sale, cashiers call in a check to the FBI or to other designated agencies to ensure that each customer does not have a criminal record or isn't otherwise ineligible to make a purchase. It must be noted that the number of calls made to the FBI does not reflect the actual number of guns transferred and sold. It is a strong indicator, though.

NSSF-ADJUSTED NICS	
2008	8,993,964
2009	9,534,131
2010	9,436,182
2011	10,791,275
2012	13,780,285
2013	14,796,872
2014	13,090,383
2015	14,244,240
2016	15,700,471
2017	13,967,825

On the corporate front, meanwhile, Remington Arms, which has been around for more than two hundred years, dating back to 1816

when Eliphalet Remington II worked with a local gunsmith to create a flintlock rifle, announced that it was filing for bankruptcy. The company employs 3,500 people and is among the largest American manufacturers of ammunition and firearms. People in the industry say that the company is not going away, that it is merely restructuring itself to be a leaner, meaner company in the future.

Another American icon, Weatherby, which has been around since 1945, announced that it was moving out of California and heading to Sheridan, Wyoming. In a statement by company president Adam Weatherby, the grandson of the founder, Weatherby is "… looking forward to operating in a state that truly supports the Second Amendment and provides some of the best big-game hunting in the world. Its tax-friendly environment, low cost of living, and growing workforce will undoubtedly help us grow as we look toward the future."

Finally, Kimber, based in Yonkers, New York, for the past twenty-two years, announced that it is building a new factory in Troy, Alabama. "We will be building a large, automated, state-of-the-art design engineering and manufacturing facility in Troy to support Kimber's growth plan and strategy," said Greg Grogan, Kimber's chief operating officer. "Troy offers us expansion with a passionate workforce, affordable utility costs, a pro-business environment, experienced local training support, and long-term incentives from the State of Alabama and the City of Troy alike. This expansion, in conjunction with our existing manufacturing facilities, talented and experienced employees, and best-in-class products provides for exciting times here at Kimber."

Jamie Wayt of Cimarron Firearms with a replica Model 1860 Henry, at the SHOT Show (Shooting, Hunting, and Outdoor Trade Show) in Las Vegas in January 2018. The rifle was referred to by Confederate troops as "that damn Yankee rifle that you load on Sunday and shoot all week." It was good fortune for the South that the genius of Northern military leadership decided the boys in blue were better off with their traditional single-shot rifles. This faithful reproduction of the 1860 Civil War Henry rifle, complete with military sling swivels, is offered exclusively by Cimarron Firearms Co.

Some industry insiders hinted that New York's general anti-gun atmosphere had something to do with this move. The same was noted when Remington started moving workers out of its Ilion, New York, facility a few years ago.

So, a lot is going on in the firearms industry. And through it all,

the *Shooter's Bible* keeps chugging along, featuring every new firearm and new ammo in the New Products section, and every in-production firearm in the main body of the six-hundred-plus-page book. To meet demand for new firearms, manufacturers have come out with a host of new products in the past year. As you'll read in Robert A. Sadowski's new product report, "Guns, Optics, and Ammo 2019," beginning on page 7, the news in handguns for 2018 centers on striker-fire pistols, with SIG, Remington, and Ruger, to name just a few, offering high-quality models for conceal carry. Chassis-style rifles are still extremely popular, with Savage, Winchester, and Remington now offering affordable 1,000-yard shooters. In shotguns, Browning, TriStar, and Beretta have come out with semiautomatic shotguns for hunting and clay sports. In optics, manufacturers continue to come out with quality options for long-range shooting and MSR/AR-15-style guns. Some reflex sights for handguns are also definitely worth checking out.

If you own or want to buy currently produced firearms, then you'll want to check out the existing products section starting on page 113. Here is where you'll find nearly every gun currently in production, with up-to-date prices and specs. If you own a gun that isn't in this section, it is probably out of production, in which case you need to pick up a copy of another Skyhorse publication, the *Gun Trader's Guide*. The fortieth edition just came off the presses.

Shooter's Bible researcher Lindsey Breuer-Barnes trying out a Smith & Wesson M&P9 Pro Series C.O.R.E. on the range.

If this is the first time you have picked up a copy of the *Shooter's Bible*, you should know that it has a long, illustrious past. The first numbered edition was published in 1925. It's been published annually, and in some cases biannually, ever since, and continues to be the ultimate reference book for millions of people who want information on new guns, ammunition, and optics.

The Skyhorse staff is proud of this newest edition of the *Shooter's Bible*, a book that has been continually updated and fact-checked for the past twelve months. Now that this edition is off the presses, we're already going to work on next year's edition. It's an ongoing process, and given all the technological changes going on

in the industry, it's one that gets more interesting every year.

GUNS, OPTICS, AND AMMO 2019

By Robert A. Sadowski

Striker-fire pistols continue to be the lion's share of new handguns with SIG, Canik, Ruger, and others offering quality models for conceal carry. Chassis-style rifles are extremely popular and can be extremely expensive, but a number of brands such as Savage, Winchester, and Remington are offering affordable one-thousand-yard shooters. There are notable new Browning, Tri-Star, and Beretta semiautomatic shotguns for hunting and clay sports worth taking a look. Optic manufacturers are providing scopes for long-range shooting, reflex sights for handguns, and plenty of choices for MSR/AR15-style guns. Ammunition continues to be fine-tuned for specific scenarios, be it Hornady's 300 BLK Subsonic or Federal Premium's 3rd Degree turkey hunting loads. Here are the details.

Optics

Bushnell (bushnell.com)

The AR Optics Haste is a forward-grip laser in red (MSRP: $248/red laser, $348/green laser) that is waterproof, ergonomic, and designed to easily attach to any MSR and AR-style pistol. The Haste mounts under the bore, and provides a bright, continuous, long-lasting beam with the push of a single button. The AR Optics Chase (MSRP: $248/red laser, $348/green laser) is two sights in one. Push one button for a bright, continuous laser beam or push another to engage the flip-up front sight. The AR Optics Rush (MSRP: $275/red laser, $375/green laser) is a hi-rise mount with a built-in laser sight for close-quarter environments. It is compatible with any optic that can be mounted on a Picatinny rail.

LEUPOLD MARK 5HS 5–25X56MM

Leupold (leupold.com)

The new Mark 5 line of tactical riflescopes features two models. The 5–25x56mm (MSRP: $2,599) is ideal for long- to extreme-distance shots, while the 3.6–18x44mm (MSRP: $2,399) is a more compact design. Both feature all-new M5C3 ZeroLock adjustments and are available with or without illuminated reticles, including the TMR, Combat Competition Hunter (CCH), H59, and Tremor 3. The new VX-Freedom scope series offers versatility for high-power big-game rifles, as well as rimfire firearms, MSRs, and muzzleloaders. Models include 1.5–4x20mm (MSRP: $259), 2–7x33mm (MSRP: $259), 3–9x40mm (MSRP: $324), 4–12x40mm (MSRP: $389), and 3–9x50mm (MSRP: $324). All models offer second focal plane reticles including a Tri-MOA for long-range shooters, and the new Pig Plex reticle optimized for hunting feral hogs.

Nightforce Optics (nightforceoptics.com)

The ATACR series now includes a 1–8x24mm (MSRP: $2,800) with a first focal plane configuration. This low-profile scope is only 10 inches in length, capped turrets have .1 Mil-Radian increments, and Power Throw Lever (PTL) for quick magnification changes. The NX8 1–8x24mm (MSRP: $1,800) is the latest addition to the legendary NXS line. Optimized specifically for short- to medium-range shooting, this small and compact scope adds minimal size and weight.

NIGHT OPTICS SVTS-80

Night Optics (nightoptics.com)

The new SVTS riflescope line features three models: the SVTS-80 Fusion NV/Thermal riflescope (MSRP: $1,199), the SVTS-320 Mid-Range Thermal Riflescope (MSRP: $1,999), and the SVTS-640 Long-Range Thermal Riflescope (MSRP: $3,499). These scopes feature continuous calibration, which assures the screen will not freeze at a critical moment. The Heat Tracker feature quickly identifies the next target with an arrow pointing to targets outside of the visible screen.

SZECSEI AND FUCHS HUMMINGBIRD SIDE-BY-SIDE

SZECSEI AND FUCHS AFRICAN QUEEN

DOUBLE-BARREL BOLT ACTION REPEATING RIFLE

Action: Double-barrel bolt
Stock: Hand selected, exclusive grade, Turkish walnut
Barrel: 20 in.–24 in.
Sights: Options of scopes or open sights
Weight: Small caliber rifles: approx. 7 lb. 8 oz.; Large caliber rifles: 9 lb. 12 oz.–12 lb.
Caliber: Available in many popular calibers, starting with .17 HMR all the way up to large game calibers, like Szecsei & Fuchs' custom .700 SSS
Magazine: Detachable box, 4+2 rounds
Features: The DBR, only custom built to personal taste, is crafted with great care and handiwork from the finest materials. Incorporating a design remarkable for its cleverness, the six-shot magazine feeds two rounds simultaneously, both of which can be fired by two quick pulls of the trigger. The triggers have integrated, noiseless double firing safety catches, the barrels may be requested in either octagon or round profile, and a one-piece bolt reloads two rounds with each cycle of the action. Starting with the selection of either side-by-side or over-and-under, the rifle can be personalized with exquisite custom engravings, optics, mounts and rings, extra magazines, and custom leather-bound cases. *As these rifles are custom order only, and with the fluctuation of the U.S. dollar, it is best to contact the sales representative listed in back to obtain a firm quotation. Average product delivery currently 16 months.
MSRP Small caliber rifles are $25000.00 and up. Large caliber rifles are approximately $100000.00 and up. Both small and large calibers are available in side-by-side and over/under rifle configurations (African Queen $190k as shown).

From: $5.37–$12.29

REMINGTON ULTIMATE DEFENSE BUCKSHOT

REMINGTON HYPERSONIC STEEL

REMINGTON PREMIER ACCUTIP BONDED SABOT

MANAGED-RECOIL BUCKSHOT

Features: With less felt recoil than full velocity loads, Express Managed-Recoil Buckshot is an ideal close-range performer; less recoil means second shot recovery is quicker, allowing the user to get back on target more easily; loads are buffered for dense patterns, allowing for highly effective performance at up to 40 yards
Available in: 12 Ga. (2¾ in.); Shot size: 00
From: $5.52

PREMIER ACCUTIP BONDED SABOT

Features: Guided by our new Power Port Tip, the AccuTip Bonded Sabot Slug delivers a degree of accuracy and terminal performance unmatched by any other we tested; yields over 95 percent weight retention thanks to its spiral nose cuts, bonded construction, and high-strength cartridge brass jacket; designed for fully-rifled barrels only
Available in: 12, 20 Ga. (2¾ in., 3 in.)
From: $15.42–$17.71

SLUGGER HIGH VELOCITY

Features: This is the first high-velocity Foster-style lead slug which exits the barrel at 1800 fps, 13 percent faster than standard 1-oz. slugs; the $^{7}/_{8}$ oz. Slugger High Velocity delivers 200 ft.-lbs. more energy at 50 yards with flatter trajectory on deer than standard 1-oz. slugs; designed for the avid deer hunter using smooth bore guns
Available in: 12 Ga. (2¾ in., 3 in.), 20 Ga. (2¾ in.)
From: $4.59–$6.81

SLUGGER MANAGED-RECOIL RIFLED

Features: Slugger Managed-Recoil Rifled Slugs offer remarkably effective performance but with 45 percent less felt recoil than full velocity Sluggers; with effective energy out of 80 yards, these 1-oz. slugs easily handle the majority of shotgun deer hunting ranges
Available in: 12 Ga. (2¾ in.)
From: $5.41

SLUGGER RIFLED

Features: Remington redesigned their 12-gauge Slugger Rifled Slug for a 25 percent improvement in accuracy; at 1760 fps muzzle velocity, the 3-in. 12-gauge Magnum slug shoot 25 percent flatter than regular 12 gauge slugs
Available in: 12 Ga. (2¾ in., 3 in.), 16 Ga. (2¾ in.), 20 Ga. (2¾ in.), .410 (2½ in.)
From: $5.10–$6.81

ULTIMATE DEFENSE BUCKSHOT

Features: Dense patterns and big knock-down power; short-range patterns through smoothbores are tight; .410-bore loads house four lead 000 buckshot pellets
Available in: 12 ga 3 in., 2 ¾ in., 20 ga. 3 in., .410-bore 2 ½ in., 3 in. 12 ga. in 00 or No. 4 Buck; 20 ga. in No. 3 Buck; .410-bore in 000 Buck
12 ga. 2 3/4-in.: $5.26–$5.76

Loaded with 100 percent HEX Shot, you get more pellets on target, a larger kill zone, and more trauma inducing pellets than ever before, meaning quick kill shots
Available in: 12 Ga. (2¾ in., 3 in., 3½ in.), 20 Ga. (3 in.); Shot size: BB, 1, 2, 3, 5
Box 25: N/A

BLIND SIDE MAGNUM PHEASANT

Features: High Packing density for increased powder charge with hinged wad results in 1675 fps; high velocity HEX Shot allows reduced leads and increased pellet energy; diamond cut wad design provides choke responsiveness for increased kill zone; Drylok Super Steel System keeps your powder dry
Available in: 12 (2 ¾ in., 3 in.)
Box: N/A

BLIND SIDE MAGNUM WATERFOWL

Features: High Packing density for increased powder charge with hinged wad results in 1675 fps; high velocity HEX Shot allows reduced leads and increased pellet energy; diamond cut wad design provides choke responsiveness for increased kill zone; Drylok Super Steel System keeps your powder dry
Available in: 12 (2 ¾ in., 3 in., 3 ½ in.), 20 (3 in.)
Box: N/A

LONG BEARD XR

Features: Features Shot-Lok technology; offers the tightest patterns and longest shot capability of any traditional turkey load with twice the pellets in a 10-in. circle out to 60 yds
Available in: 12 Ga. (3 in., 3 ½ in.), 20 Ga. (3 in.)

Box 10: N/A

ROOSTER LOK'D & LETHAL XR

Features: Protects shot during in-bore acceleration; shot launches from barrel near perfectly round for extremely tight long-range patterns; greater penetration over standard lead loads beyond 50 yards; devastating terminal on-target performances
Available in: 12 (2 ¾ in., 3 in.)
Box: N/A

SUPER TARGET LOADS

Available in: 12, 20 Ga. (2¾ in.); Shot sizes: 7, 7.5, 8, 9
Box 25: N/A

SUPER PHEASANT LOADS

Available in: 12 Ga. (2¾ in., 3 in.), 20 Ga. (3 in.); Shot sizes: 4, 5, 6
Box 25: N/A

SUPER PHEASANT STEEL LOADS

Available in: 12 Ga. (3 in.); Shot size: 4
Box 25: N/A

SUPER-X TRIALS AND BLANKS

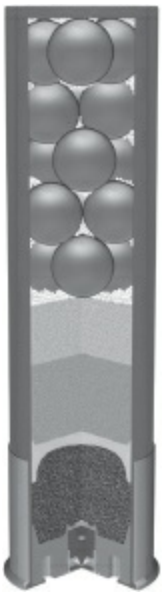

Available in: 10 Ga. ($27/_8$ in.), 12 Ga. (2¾ in.)
Box 25: N/A

SUPER-X TURKEY LOADS

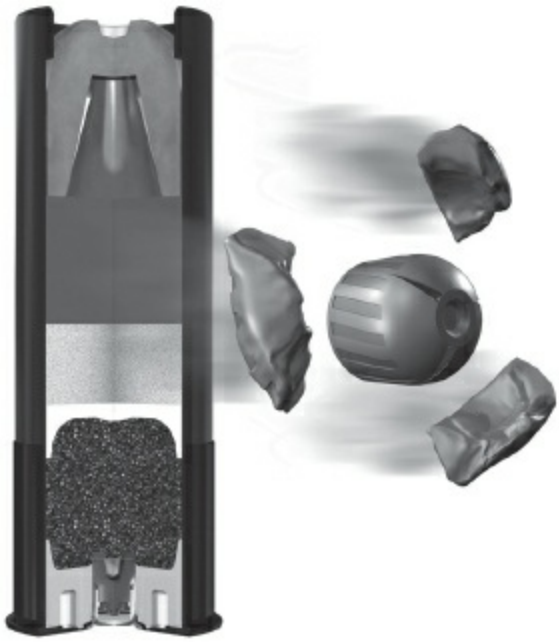

Available in: 12 Ga. (2¾ in., 3 in.); Shot sizes: 4, 5, 6
Box 10: N/A

WINCHESTER AMMUNITION VARMINT-X

WINCHESTER AMMUNITION SUPER-X BUCKSHOT

WINCHESTER AMMUNITION PDX1 DEFENDER SEGMENTING SLUG

SUPER-X XPERT HI-VELOCITY STEEL LOADS

Available in: 12 Ga. (2¾ in., 3 in.), 20 Ga. (3 in.); Shot sizes: BB, 1, 2, 3, 4
Box 25: N/A

SUPER-X XPERT STEEL LOADS

Available in: 12, 20, 28 Ga., .410 bore (2¾ in.); Shot sizes: 6, 7
Box 25: N/A

VARMINT-X

Features: Shot-Lok technology; 50 percent more pellets in a 10 in. circle at 40 yds; greater penetration over standard lead loads beyond 40 yds; devastating terminal on-target performance
Available in: 12 Ga. (3 in.); Shot size: BB
Box 10: N/A

Shotgun Ammunition–Slugs & Buckshot

PDX1 12 SLUG AND BUCK

Features: The 12-gauge PDX1 Defender ammunition features a distinctive black hull, black oxide high-base head and three pellets of Grex buffered 00 plated buckshot nested on top of a 1 oz. rifled slug; an ideal, tight patterning personal defense load; slug/buckshot combination provides optimum performance at short and long ranges while compensating for aim error
Available in: 12 Ga. (2¾ in.)
Box 10: N/A

PDX1 DEFENDER SEGMENTING SLUG

Features: The uniquely designed slug segments into three pieces when fired into FBI protocol barriers such as bare, light cloth, and heavy cloth covered ballistic gelatin; the round is designed to compensate for aim error over traditional slugs.
Available in: 12 Ga. (2¾ in.), 20 Ga. (2¾ in.)
Box 10: N/A

RACKMASTER RIFLED SLUGS

Features: The RackMaster system design consists of a hard-hitting lead nose and the innovative WinGlide rear projectile stabilizer, engineered specifically to improve in-bore alignment and enhance down-range accuracy; delivers high accuracy, hard-hitting knockdown performance to hunters shooting shotguns with either smooth bore, rifled choke tube or fully-rifled barrels
Available in: 12 Ga. (2¾ in., 3 in.), 20 Ga. (2¾ in.)
Box 5: N/A

SUPER-X BUCKSHOT

Available in: 12 Ga. (2¾ in., 3 in., 3½ in.), 20 Ga. (2¾ in.), .410 (2½ in., 3 in.); Shot sizes: 4, 3, 1, 00, 000
Box 5: N/A

MUZZLELOADING BULLETS

Barnes Bullets

H15045BR

HARVESTER MUZZLELOADING CRUSHED RIB SABOT

EXPANDER MZ

Features: 100 percent copper with a large, hollow cavity; six copper petals with double-diameter expansion; full weight retention
Available in: .45 (195 gr.), .50 (250, 300 gr.), .54 (275, 325 gr.)
Box of 15: $16.90–$21.05
Box of 24: $22.69–$27.23

SPIT-FIRE MZ

Features: A streamlined semi-spitzer give, boattail base and tack-driving accuracy; six razor-sharp copper petals create massive shock, deep penetration, and double-diameter expansion; retains virtually 100 percent of its original weight; available in 15 and 24-bullet packs
Available in: .50 (245, 285 gr.)
Box of 15: $18.97–$19.38
Box of 24: $23.92–$24.75

SPIT-FIRE TMZ

Features: 100 percent copper boattail design with streamlined polymer tip

for faster expansion; expands at 1050 fps.; remains intact at extreme velocities; redesigned sabot loads faster while retaining tight gas seal
Available in: .50 (250, 290 gr.)
Box of 15: $18.56–$18.97
Box of 24: $26.40-$28.05

Harvester Muzzleloading (J-Ron, Inc.)

HARVESTER SABER TOOTH BELTED

BARNES BULLETS SPIT-FIRE TMZ

CRUSHED RIB SABOT

Features: 50 percent less loading friction; consistent ignition and superb

accuracy
Available in: .45 (.400); .50 (.400, .429–.430, .451–.452)
Box 50: $9.49–$10.49

SABER TOOTH BELTED

Features: Copper-clad belted bullets in Harvester Crush Rib Sabot
Available in: .50 (250, 270, 300, 350 gr.)
MSRP $15.99

HARVESTER SCORPION FUNNEL POINT MAG

HARVESTER SCORPION PT GOLD

SCORPION FUNNEL POINT MAG

Features: Electroplated copper plating does not separate from lead core; loaded in Harvester Crush Rib Sabots
Available in: .50 (240, 260, 300 gr.); .54 (240, 260, 300 gr.)
MSRP $9.99–$13.99

SCORPION PT GOLD

Features: Scorpion PT Gold Ballistic Tip Bullets are electroplated with copper plating that does not separate from lead core; offers greater accuracy at longer ranges than a hollow point; 3 percent antimony makes the bullet harder than pure lead
Available in: .45 (240, 260, 300 gr.); .50 ((240, 260, 300 gr.)
MSRP $14.99–$25.99

Hornady Manufacturing

HORNADY GREAT PLAINS - PA CONICAL

HORNADY MONOFLEX ML

GREAT PLAINS - PA CONICAL

Features: Delivers greater accuracy and more knock-down power; PA bullets are prelubed with special knurled grooves on the bearing surface to hold the lubricant on the bullet—no need for a patch or sabot
Available in: .50 (385 gr.); .54 (425 gr.)
MSRP N/A

MONOFLEX ML

Features: Constructed with the Hornady Flex Tip and retaining 95 percent of its original weight, it's available in both a High Speed/Low Drag sabot and Lock-N-Load Speed Sabot
Available in: .50 cal. sabot with .45 cal. (250 gr.) bullet
MSRP N/A

Knight Rifles

KNIGHT RIFLES BLOODLINE BULLETS

BLOODLINE BULLETS

Features: Individually machined, double knurled bullets for increased visual blood trails
Available in: .45 (185, 200 gr.); .50 (220, 250, 275, 300, 350 gr.); .52 (220, 275, 300, 350 gr.); .54 (325 gr.)
Box 20: $29.99–$37.99

RED HOT BULLETS

Features: Saboted Barnes solid copper bullet with superior expansion
Available in: .45 (175, 195 gr.); .50 (250, 300, 350 gr.); .52 (275, 350, 375 gr.)
MSRP $26.99–$37.99

PowerBelt Bullets

POWERBELT AEROLITE

POWERBELT COPPER

POWERBELT PLATINUM AEROTIP

POWERBELT PURE LEAD HOLLOW POINT

AEROLITE

Features: Designed specifically for use with standard 100-grain loads; AeroLite's shape is noticeably longer and more aerodynamic than other PowerBelts of similar weight; longer length is made possible by the massive hollow point cavity that is filled by an oversized polycarbonate point
Available in: .45 (250 gr.), .50 (250, 300 gr.)
MSRP $32.95–$33.95

COPPER

Features: Thin copper plating reduces bore friction while allowing for optimal bullet expansion; available in four tip designs: Hollow Point, AeroTip, Flat Point, and Steel Tip
Available in: .45 (195, 225, 275 gr.); .50 (223, 245, 295, 348, 405, 444 gr.); .54 (295, 348 gr.)
MSRP $23.95–$28.95
50-packs: $59.95–$70.95

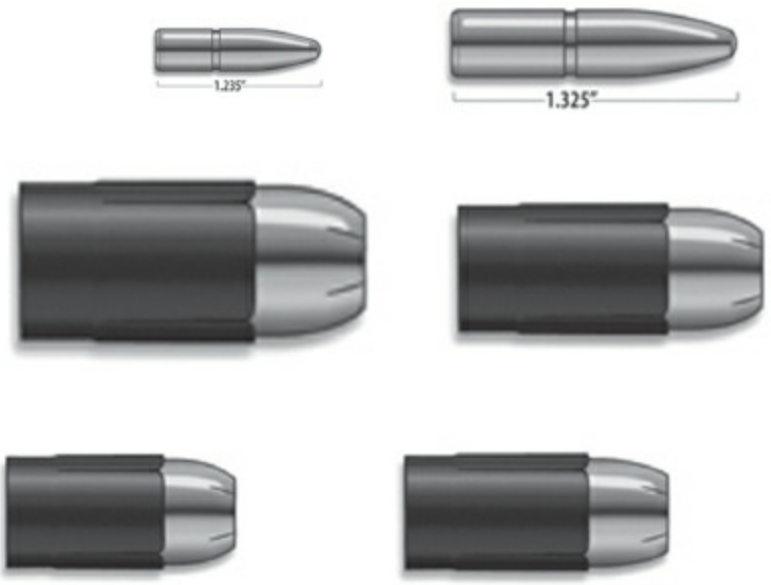

PLATINUM AEROTIP

Features: Proprietary hard plating and aggressive bullet taper design for improved ballistic coefficient; large-size fluted gas check produces higher and more consistent pressures
Available in: .45 (223, 300 gr.); .50 (270, 300, 338 gr.)
MSRP $30.95–$32.95

PURE LEAD

Features: Pure lead, available in four different grain weights in Hollow Point and 444 in Flat Point
Available in: .50 (295, 348, 405, gr.); .54 (295, 405 gr.)
MSRP $23.95–$24.95

Swift Bullet Company

SWIFT A-FRAME MUZZLELOADING BULLETS

A-FRAME MUZZLELOADING BULLETS

Features: Muzzleloader and heavy revolver A-Frame bullets are one in the same; initiate expansion at 950 feet per second, expand to .65x their original caliber, and maintain 97% of their weight; virtually indestructible at velocities in excess of 3000 feet per second
Available in: .50 (240, 300 gr.); .54 (265, 325 gr.)
Box: S18.00

Thompson/Center Arms

THOMPSON/CENTER SHOCK WAVE SABOTS

THOMPSON/CENTER MAXI-BALL

THOMPSON/CENTER SUPER 45 XR SABOTS

MAXI-BALL

Features: An exceptionally accurate bullet and the preferred bullet for penetration needed for large game like elk; lubricating grooves (maxi wide grooves)
Available in: .50 (275, 350 gr.)
Box 20: $28.00–$29.00

SHOCK WAVE SABOTS

Features: Polymer tip spire point bullet with sabot; incorporates harder lead core with walls interlocked with the jacket for maximum weight retention and expansion; available with spire point or bonded bullets
Available in: Bonded Core in Super Glide Sabots .50 (250, 300 gr.); Controlled Expansion in Super Glide Sabot .50 (250, 300 gr.); Bonded Core in Mag Express Sabots .50 (250, 300 gr.); Controlled Expansion in Mag Express Sabots .50 (200, 250, 300) and .45 (200 gr.)
Bonded Core Super Glide: $31.00–$32.00

Controlled Expansion Super Glide: $23.00–$24.00
Bonded Core Mag Express: $31.00–$32.00
Controlled Expansion Mag Express: $22.00–$35.00

SUPER 45 XR SABOTS

Features: Centerfire weight performance without the recoil, Super 45 XR sabots have a flatter trajectory, provide deep penetration, and nearly 2 times the expansion of its original diameter.
Available in: .45 (155 gr.)
Box 30: $26.00

Umarex

UMAREX ARX

ARX

Features: Designed in conjunction with PolyCase Ammunition Development Lab; SpeedBand sabot available calibers include .357, .40, and .45, while a .45-caliber option has Umarex's base-style SpeedBelt; acceptable for use in large-bore airguns, including Umarex's Hammer .50-caliber
Available in: .357, .40, .45
Box 20: N/A

BULLETS

Barnes Bullets

Barnes continues to develop leading-edge products with a wide range of workability and functionality using an incredibly broad range of purpose-built components and ammunition. Barnes's most popular hunting bullets, the all-copper TSX line, also comes with a streamlined polymer tip. The Barnes Buster line can be used for both rifles and handguns.

Berger Bullets

Famous for their superior performance in benchrest matches, Berger bullets also include hunting designs. From .17 to .30, all Bergers feature fourteen jackets with a wall concentricity tolerance of .0003. Lead cores are 99.9 percent pure and swaged in dies to within .0001 of a round. Berger's line includes several profiles: Match, Low Drag, Very Low Drag, Length Tolerant, and Maximum-Expansion, besides standard flat-base and boattail.

Swift Bullet Company

Rifle Bullets

The Scirocco II rifle bullet starts with a tough, pointed polymer tip that reduces air resistance, prevents tip deformation, and blends into the radius of its secant ogive nose section. The Scirocco II has a bonded core construction with a pure lead core encased in a tapered, progressively thickening jacket of pure copper. The Swift A-Frame bullet with its midsection wall of copper is less aerodynamic than the Scirocco, but it produces a broad mushroom while carrying almost all its weight through muscle and bone.

Woodleigh Bullets

HYDROSTATICALLY STABILIZED

Hydrostatic stabilization is a method of producing pierced hollow bars to very precise concentricity to produce a bullet that resists deflection and achieves deep straight-line penetration. It's non-toxic and environmentally sensitive. It can be used in most nitro double and magazine rifles.
10–20 per box: $31.00–$80.00

TRADITIONAL BULLETS

Fashioned from gilding-metal-clad steel 2mm thick, jackets on FMJ bullets are heavy at the nose for extra impact resistance. The jacket then tapers toward the base to assist rifling engraving. Woodleigh Weldcore Soft Nose bullets are made from 90/100 gilding metal (90 percent copper; 10 percent zinc) 1.6 mm thick.

Centerfire Rifle Ballistics

Comprehensive Ballistics Tables for Currently Manufactured Sporting Rifle Cartridges

No more collecting catalogs and peering at microscopic print to find out what ammunition is offered for a cartridge, and how it performs relative to other factory loads! *Shooter's Bible* has assembled the data for you, in easy-to-read tables, by cartridge.

Data is taken from manufacturers' charts; your chronograph readings may vary. Listings are not intended as recommendations. For example, the data for the .44 Magnum at 400 yards shows its effective range is much shorter. The lack of data for a 285-grain .375 H&H bullet beyond 300 yards does not mean the bullet has no authority farther out. Besides ammunition, the rifle, sights, conditions and shooter ability all must be considered when contemplating a long shot. Accuracy and bullet energy both matter when big game is in the offing.

Barrel length affects velocity, and at various rates depending on the load. As a rule, figure 50 fps per inch of barrel, plus or minus, if your barrel is longer or shorter than 22 inches.

Bullets are given by make, weight (in grains) and type. Most type abbreviations are self-explanatory: BT=Boat-Tail, FMJ=Full Metal Jacket, HP=Hollow Point, SP=Soft Point—except in Hornady listings, where SP is the firm's Spire Point. TNT and TXP are trademarked designations of Speer and Norma. XLC identifies a coated Barnes X bullet. HE indicates a Federal High Energy load, similar to the Hornady LM (Light Magnum) and HM (Heavy Magnum) cartridges.

Arc (trajectory) is based on a zero range published by the manufacturer, from 100 to 300 yards. If a zero does not fall in a yardage column, it lies halfway between—at 150 yards, for example, if the bullet's strike is "+" at 100 yards and "-" at 200.

Rimfire Ballistics

Rimfire cartridges have had a longer run than any centerfire you can name. Horace Smith and Daniel Wesson came up with the first successful .22 rimfires in the United States in 1857. Thirty years later the .22 Long Rifle arrived, courtesy of the J. Stevens Arms & Tool Company. It used 5 grains of black powder to drive a 40-grain bullet, shortly making the transition to smokeless in a case crimped on a heeled bullet. Remington produced the first modern high-speed load in 1930. Current .22 ammo includes myriad Long Rifle listings. The Long (essentially a Short bullet in a Long Rifle case), like the CB and WRF cartridges, is going the way of the dodo. The shot load of #12 "dust" has faded too, though it has dispatched many snakes, and was once hailed as just the ticket for barn mice and rats when you didn't want to perforate the boards. New rimfires have joined the versatile Long Rifle. The .22 WMR (Winchester Magnum Rimfire) came in 1959. More than four decades passed before Hornady necked down the WMR case to form the .17 HMR. A sibling on the CCI Stinger variation of the .22 LR appeared in 2004. Hornady dubbed it the .17 Mach 2. The newest .17, Winchester's Super Mag, arrived in 2013. The .17s and the .22 WMR feature jacketed hollowpoint and polymer-tipped bullets, just like centerfires.

This list is incomplete. For convenience (and given space constraints), it omits duplicate loads—those by the same manufacturer but under different labels). Units: velocity in feet per second, energy in foot-pounds, drop in inches.

Centerfire Handgun Ballistics

Data shown here is taken from manufacturers' charts; your chronograph readings may vary. Barrel lengths for pistol data vary, and depend in part on which pistols are typically chambered in a given cartridge. Velocity variations due to barrel length depend on the baseline bullet speed and the load. Velocity for the .30 Carbine, normally a rifle cartridge, was determined in a pistol barrel.

Listings are current as of February the year *Shooter's Bible* appears (not the cover year). Listings are not intended as recommendations. For example, the data for the .25 Auto gives velocity and energy readings to 100 yards. Few handgunners would call the little .25 a 100-yard cartridge.

Abbreviations: Bullets are designated by loading company, weight (in grains) and type, with these abbreviations for shape and construction: BJHP=brass-jacketed hollowpoint; FN=Flat Nose; FMC=Full Metal Case; FMJ=Full Metal Jacket; HP=Hollowpoint; L=Lead; LF=Lead-Free; +P=a more powerful load than traditionally manufactured for that round; RN=Round Nose; SFHP=Starfire (PMC) Hollowpoint; SP=Softpoint; SWC=Semi Wadcutter; TMJ=Total Metal Jacket; WC=Wadcutter; CEPP, SXT and XTP are trademarked designations of Lapua, Winchester and Hornady, respectively.
